Subject: FW: Canadian Radium & Uranium Corp. Site EPA Site Contact No. EP-S2-14-01

Following up again on my email below. Is there a good time we can talk or can these documents be emailed? Team would like to move forward on the site and would really appreciate an update. Thanks, Linda Shaw

Mr. Gaughan, I just left you a voice mail explaining that I am the new environmental counsel for Mark Stagg, one of the owners, and was hoping you can help me locate the following information and discuss the status of a Remedial Action that would be acceptable to EPA for the site:

1. Geological Information about the Site – depth to groundwater and thickness of the aquifer (Report called Final Phase III Removal Assessment Trip Report May 15, 2017 indicates two different groundwater depths 5 ft bgs and 23 ft bgs)
2. Off-Site groundwater investigation results
3. Status of Remedial Action Work Plan

Please advise if we can set up a time to talk. Thank you, Linda Shaw
